Contents

zen_download_files   *Download files of a Zenodo repository*

Description

Downloads files of a Zenodo repository. If the repository is in restricted access, a token (argument token) must be provided.

Usage

```
zen_download_files(record_id, token, path = ".", files = NULL)
```

Arguments

record_id	a character of length 1. The Zenodo identifier of the repository (7 numbers). Can be found on the URL of the repository
token	a character of length 1. A token generated by Zenodo to access files of a restricted access.
path	a character of length 1. The folder in which files will be saved.
files	a character vector. If one or several files are provided, only these files will be downloaded. If NULL (default) all files will be downloaded.

Value

No returned value.

Examples

```
# List files available in the repo: https://zenodo.org/record/7936568 ----
zen_list_files("7936568")

## Not run:
# Download one file ----
zen_download_files("7936568", files = "FORCIS_pump_v03_14062023.csv")

# Download all files ----
zen_download_files("7936568")

## End(Not run)
```

---

zen_list_files *List files of a Zenodo repository*
